WHAT'S WHAT?

Headset	A headset is composed of two speakers and a microphone (where applicable). IMC motorcom offers Headsets which fit perfectly to all kind of helmet types.
HS	The mnemonic for our Headset series.
PMR	Private Mobile Radio, known as PMR446, is a European standard licence-free radio service with 8 channels at 12.5 KHz spacing in the 446 MHz band. Similar to the US FRS and GMRS service, regulatory authorities require that radios have a maximum of 500 mW ERP (Effective Radiated Power) to a fixed antenna. This limits range to a maximum of about 2 miles in open country. PMR is for use in most European countries.
PTT	Push-To-Talk button sets the radio device in transmission mode. Normally -button released- the device operates in unattended reception mode. While talking the button has to be pressed. This button is required, as most radio devices run in simplex mode, i.e. send or receive at the same time.
MIT	The mnemonic for our motorcycle intercom and telecommunication series.
MIP	The mnemonic for our motorcycle intercom and private radio series.
VOX	The Voice Operated eXchange function sets the radio device automatically in transmission mode, while speaking. This allows hands-free communication. It is comparable with an electronic PTT button.
Wireless Bluetooth	With wireless Bluetooth Technology a communication between two or more devices can be established. Wireless Bluetooth offers a wide range of applications. The advantage of Bluetooth technology against Infrared is that the devices use radio transmission.

*YOUR FAVOURITE MUSIC
ON THE ROAD!*

HS-200

Make your helmet your mini stereo unit – the very light headset can easily be installed into every type of helmets.

The 6 mm slim speaker pads can be fixed by Velcro tape. This enables easy removal for cleaning the helmet lining.

Using the 3.5 mm stereo jack of the HS-200, you can connect mobile audio sources such as CD/MP3-players or PDA's.

3

HS-205

Navigation systems by Garmin®, Navman® and many others can be connected by using the 2.5 mm mono jack of the HS-205.

HS-200 for music

HS-205 for GPS

EVEN MORE POWERFUL!

MAP-20

Amplify the power of your audio device and enjoy your favourite music even more. This audio amplifier with rechargeable battery increases the output range up to ten times. It is the ideal way to get maximum performance from your HS-200, MIT-30 and MIT-100.

Audio input: 3.5mm stereo male plug,
audio output: 3.5mm stereo female jack

+ IN TOUCH

MIT-30

MIT-30 Intercom System
with audio- and mobile phone connection

You will be impressed by the features included in the multi function box of the MIT-30.

The intercom system isn't much bigger than a cigarette pack and you can connect it to an audio source and a mobile phone.

6

The set includes two headsets for full-face helmets (with a pair of Velcro microphones) and for open face or flip-up helmets (with a pair of boom held microphones).

All connection cables are long enough for the control box to be placed under the seat. The FireWire connectors enable a separate plug in, while the electronics remain on the bike.

Depending on your helmet type the sound quality is good up to max. 150 km/h (90 mph).

TEAM MINDED

MIT-100

MIT-100 Intercom with connections for Two-Way radio-, audio- and telephone

Special features of this mobile communication system are the extensive connection options for radios, mobile phones and music systems and the waterproofed PTT button.

The MIT-100 automatically switches off the music as soon as a radio or telephone signal is detected.

The two headsets are designed for full-face helmets (two pluggable Velcro microphones) and for open face/flip-up helmets (two pluggable boom held microphones).

MIT-100 for open/full-face/flip-up helmets

The coiled cable is equipped with FireWire connectors and gives great flexibility, while the box can be placed under the seat. Power is supplied by the on-board bike battery.

Depending on the helmet type, easy conversation is possible up to 150 km/h (90 mph).

GBMA

Bluetooth Adaptor for wireless connection of Garmin® navigation system to MIT/ MIP series.

TBMA

Bluetooth Adaptor for wireless connection of TomTom® navigation system to MIT/ MIP series.

GOLD WING

Communication

The new BGLW communication systems are compatible with the sound system of 1500/1800er series. They enable you to connect Garmin Zumo® and TomTom® navigation systems, Two-Way radios and iPhones® without further installation.

8

GPMS

This accessory enables the passenger to control individually the volume of music, as well as the on-off function of intercom system.

BGLW Two-Way Radio

Designed for connection with Two-Way radios, the BGLW comes with waterproof PTT-button, 3,5mm stereo jack and twin jack adaptor.

BGLW iPhone®

Designed for connection with iPhone®, the BGLW comes with a T-button to answer the phone comfortably and securely.

BGLW Garmin®

Connect your Garmin® Zumo to the BGLW and get spoken navigation instructions, music and phone (linked via Bluetooth to the Garmin) comfortably to your headset.

BGLW Bluetooth®

For wireless connection to your Bluetooth enabled mobile phone or navigation systems.

HS-X110

HS-X130

HS-X140

HS-X150

HS-X160

You do already have a motorcycle with an intercom system? Even then you don't have to miss the high comfort of our headsets.

NEW

- all earphones with pluggable connectors*
- dynamic microphones with pluggable connectors*
- improved boom microphones are more stable (5mm boom)
- ultraflat earphone pockets*

* except for HS-X140

For your full-face helmet a model with Velcro microphone is most suitable. A model with boom microphone is best for your open face or flip-up helmet.

For half helmets we provide a model with neck clamp. For helmets which are already prepared for communication systems (cable bushing) we offer one model with Velcro micro for full face helmets and one with boom micro for open / flip up helmets.

These headsets are available in various versions:

- As **HS-B** compatible with **BMW**
- As **HS-G** compatible with **Honda Goldwing**
- As **HS-H** compatible with **Harley Davidson**

WITH INTEGRATED
TWO-WAY RADIO!

MIP-200

Our top of the range intercom system is equipped with an integrated PMR/FRS² radio. Needless to say, it comes with connectors for an audio device and a mobile phone.

The waterproof PTT button with volume control can be fixed by a Velcro strap to the handlebars. The two-way radio function can be switched off.

The MIP-200 contains two headsets with Velcro microphones for your full-face helmet, as well as two headsets with boom mics for your open face/flip-up helmet.

Long connecting cords make it easy to install the control box under the seat. The two coiled cables can be extended up to 100 cm or 3.3 ft.

The magnetic antenna supplies good reception in a 4 km or 2.4 miles area depending on the surroundings. Power is supplied by the on board 12V bike battery.

Recommended for use up to a speed of 150 km/h (90 mph), depending on the helmet type.
